

Applications

- General water supply in buildings and apartments, etc
- Hot and cold water circulation
- Supply of industrial water
- Distribution of waterworks
- Irrigation and watering in rice fields and dry fields

Features

- ① Small in size and weight by adoption of a bipolar motor.
- ② Performance covering a wide range of specifications is comparable to a large sized one.
- ③ Easy installation in a small space.
- ④ Assembly and disassembly without piping disconnection possible and easy maintenance and inspection because of B.P.O. (back pull-out) structure.
- ⑤ Advantageous for piping load with stabilized installation because of upright discharge.
- ⑥ Product compliant with Japanese Industrial Standards (JIS B8313).

Standard specifications

Liquid to be lifted	Liquid quality: Clean water Liquid temperature: 0~80°C
Total suction head	-6m (20°C) However, -5m (20°C) in the case of 100 × 80
Boost pressure	See the specifications
Structure	Impeller: Closed
	Bearing: Mechanical seal
	Shaft seal: Sealed ball bearing
Material	Impeller: CAC406 (65×50M, 80×65M...FC200)
	Spindle: SUS403
	Casing: FC200 or FCD450※1
Motor	Type: Totally-enclosed-fan-cooled motor indoor type
	Power: Three-phase/200V
	Synchronous rotation speed: 3000min ⁻¹
Flange standard	JIS 10K flange
Paint color	7.5BG5/1.5

※ 1 Varies depending on type

Special specifications

Material change	All steel made, Impeller CAC406 (65×50M, 80×65M only)
Motor change	Voltage change, change to totally-enclosed-fan-cooled motor outdoor type, etc.

※ Please note that in the case of change to special specifications, the outline drawing may be partially changed.

※ Please note that product colors may differ from that in the photo.

How to read the model type

SJ 32 × 32 M 5 1.5

- | | | | | |
|---------|-------------------------------------|---|--------------------|---|
| ① | ② | ③ | ④ | ⑤ |
| ① Model | | | ④ Frequency (50Hz) | |
| | ② Nominal suction diameter (32mm) | | ⑤ Output (1.5kW) | |
| | ③ Nominal discharge diameter (32mm) | | | |

Standard accessories

Motor	1
Common base	1
Pump-priming plug	1
Coupling	1 set
Coupling cover	1

Special accessories

Foot valve	
Suction cover	
Sluice valve, Check valve	Packing, bolts and nuts attached
Foundation bolt	1 set
Mating flange	Packing, bolts and nuts attached
Special phase flange (in the case of a discharge diameter the same as the suction diameter)	Bolts and nuts attached
Tube with different diameter	See the figure below
Vibration isolated table	
Pressure gauge, vacuum gauge, compound gauge	Cock and pipe attached
Vibration proof fittings	

Foot valve, tube with different diameter, special phase flange application table

Nominal diameter mm		Foot valve nominal diameter mm	Tube with different diameter	Special phase flange
Suction s	Discharge d			
32	32	32	—	—
40	40	40	—	—
50	40	50	—	40/50
65	50	65	—	50/65
80	65	100	80×100	65/80
100	80	125	100×125	80/100

※ Special phase flange is used to adjust the discharge diameter to the suction diameter.
